

Learning Objectives

- * Begin to develop an understanding of the roles of authors and illustrators
- * Write, draw, and talk about family and cultural traditions
- * Begin to describe comparative relationships (more/less/same, number of objects or quantities)
- * Continue to create representations that contain increasing detail

Reminders

During the month of May, we invite you to join us on the playground during the last half hour of the session. Ideas include bringing bubbles to blow, something to plant, or just coming to play!

Children will have the opportunity to participate in "Open Door Days" the week of May 22nd. This provides time during first open center time, for children to explore and move freely between the Pre-K and Preschool classrooms. It is encouraged for those children moving to Pre-K in the fall, but not required.

Opening the package of live caterpillars

Last month, live caterpillars were delivered to the school for children to observe and learn about how they grow and change into a butterfly. Children had opportunities to explore natural materials outside and plant sunflowers to take home and learn about taking care of a plant.

Through these experiences, children began to develop scientific knowledge related to a variety of living things.

This month, children will grow in their understanding of the need for rules and boundaries in their learning and social environment. By participating in games and other activities, they will continue to learn to cooperate with others.

~ Ms. Amanda, Ms. Andy,
Ms. Katie and Ms. Lisa
